Olsenesteenweg 2, 8720 Oeselgem (e-mail: labiale_palp@hotmail.com).

Summary

Acylophorus glaberrimus is found in Belgium for the first time at the nature reserve "Marais de Sampont".

Keywords : Coleoptera, Staphylinidae, new record, Belgium, faunistic

Résumé

Acylophorus glaberrimus est trouver en Belgique pour le premier fois dans la reserve naturelle "Marais de Sampont".

Samenvatting

Acylophorus glaberrimus is voor het eerst gevonden in België in het natuureservaat "Marais de Sampont".

The species *Acylophorus glaberrimus* is found at the nature reserve "Marais de Sampont", near Arlon. This is the first record for Belgium. It has been found twice at 17 June 2006 at a vegetation of the association Eu-Molinion. It was at the wet side on this land, rich on typical *Carex*-species:

C. pulicaris, *C. lepidocarpa*, *C. lasiocarpa* and *C. flava*.
