Abstract

The new name *Colimarena* is proposed to replace the genus name *Colima* Jocqué & Baert, 2005, which is preoccupied in the Opiliones.

Keywords: *Colimarena*, *Colima*, Opiliones, replacement name

Samenvatting

De nieuwe naam *Colimarena* wordt voorgesteld ter vervanging van de genusnaam *Colima* Jocqué & Baert, 2005 die al gebruikt is in de Opiliones.

Résumé

Le nouveau nom *Colimarena* est proposé en remplacement du nom de genre *Colima* Jocqué & Baert, 2005, qui est déjà utilisé comme genre chez les Opilions.

Nomenclatural and taxonomic notes

JOCQUÉ & BAERT (2005) described two Neotropical genera in the Zodariidae: *Epicratinus* Jocqué & Baert, 2005 and *Colima* Jocqué & Baert, 2005. It appears that the latter is preoccupied by *Colima* Goodnight & Goodnight, 1945, a monotypic genus in the Opiliones. According to Articles 52.4, 53.2 and 60.3 of the International Code of Zoological Nomenclature, we replace it here by *Colimarena nomen novum* which is a contraction of *Colima* and Storeninae, the subfamily to which this genus belongs.

The genus contains two species that are transferred from *Colima*: *Colimarena colima* **comb. nov.** (Jocqué & Baert, 2005) and *Colimarena manzanillo* **comb. nov.** (Jocqué & Baert, 2005).

Acknowledgements

We are indebted to Danni Sherwood who attracted our attention to this homonymy.
