Instructions to authors

1. General information

The *Belgian Journal of Entomology* (BJE) is an Open access online journal which has a single article per issue format. This helps us to ensure quick publication. The scope of BJE covers all fields of entomology. We allow and even encourage the submission of long manuscripts and monographs which answer the requirements of scientific papers, written concisely and containing novelties in the field of entomological science. The material must not have been previously published elsewhere.

The *Bulletin de la Société royale belge d'Entomologie* – *Bulletin van de Koninklijke Belgische Vereniging voor Entomologie* is a printed journal with three issues a year. Each number includes the following chapters: Belgian fauna, Fauna of other regions and Correspondence. To allow all members to be able to submit to this journal, the requirements for the novelty of the findings are limited. Only exceptionally, we accept the publication of material that has been published previously and only when the text is rewritten to fit the scope and readership of this journal. The inclusion of accurate illustration, especially colour photographs, is strongly encouraged and help can be provided in this purpose by the editors if necessary.

2. Requirements

In order to publish in either of both journals, the first author needs to be a paid-up member or person belonging to an institution affiliated to the Society, either directly or by exchange. If not, he/she should pay 35 Euros when living in Belgium, or 40 Euros when abroad, and will be considered as (abroad) member during one year.

Each article must strictly comply with the recommendations described below. The articles shall be written in a clear and concise style, preferably in English, otherwise French, Dutch or German. The editors reserve the right to accept, to return for revision or to refuse any articles, subsequent to examination by a referee. The authors are solely responsible for the content of the published articles.

Authors are required to register type specimens in an official natural history collection with public access prior to publication.

3. Guidelines for papers

3.1 Type of papers

BJE only covers full length articles. These can be taxonomic papers, research papers or reviews. We accept long manuscripts.

Submissions for Bulletin S.R.B.E./K.B.V.E. can include full length articles or letters. Full length articles cover taxonomic papers, research papers, opinions or reviews. Letters include announcements of symposia, excursions or other events, book or website reviews, calls for cooperation and other small announcements. Letters contain no abstracts or keywords, should be less than 1000 words, with references kept to a minimum with a maximum of three but should include necessary illustration if relevant.

3.2 Page setting

The papers will be submitted in 12pt Times font.
