My sincere thanks are due to Prof. Dr. J. DE HEINZELIN, Rijksuniversiteit Gent, who introduced me to Palaeontology and supervised my doctoral research, and to Dr. A. CAPART, Director of the Institut Royal des Sciences naturelles, Brussels, for permission to work on collections in his charge and to use all the Institute's facilities, before I became a member of the Institute's scientific staff.

Finally I am extremely grateful to Dr. M. GLIBERT for preparing the photographs and to Dr. and Mrs. J. D. TAYLOR for reading and correcting the English manuscript. The present study was partly undertaken during a « Nationaal Fonds voor Wetenschappelijk Onderzoek » fellowship.
